What is “LactoClean spray”?

Innovative spray type of natural disinfectant for teats & udder

LactoClean spray is an effective disinfectant for teats & udder containing high concentrated Kimchi lactic acid bacteria culture. LactoClean spray has no risk of cross contamination and increases user convenience by adopting spray method.

Spray method vs. Dipping method

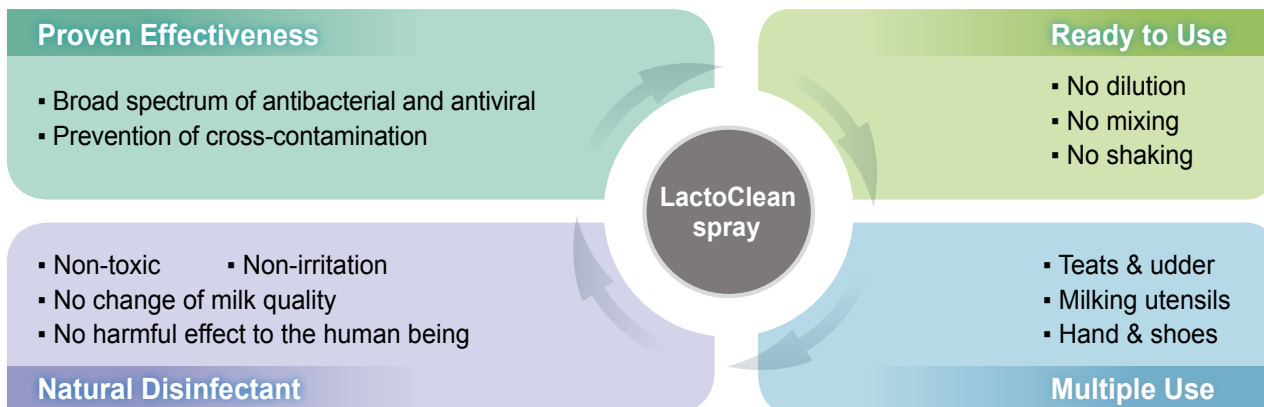

Teat disinfection	Bacteria counts / milk(ml)	Percentile
Control	3.7×10^5	100
Dipping method	1.7×10^5	45.9
Spray method	1.3×10^5	35.1

-> Bacteria counts were drastically decreased by Spray method than dipping system (23.5% difference)
